### \*USE CAUTION\*

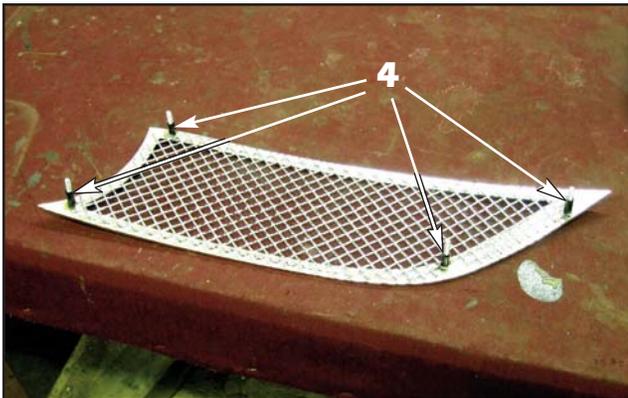

while handling the grille. The stainless steel edges and mesh can be very sharp.

1. Remove the factory mounting hardware from the bumper cover where it attaches to the core support.

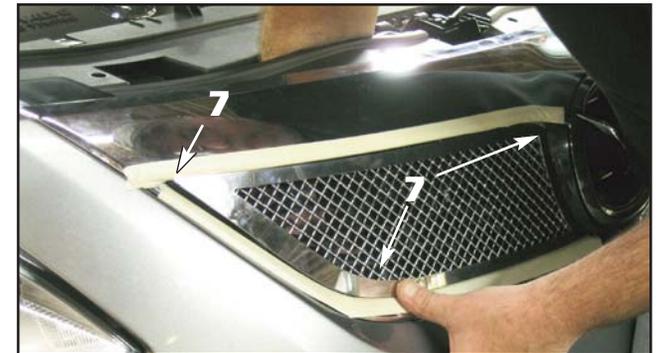

2. Remove the plastic push pins from the center of the bumper cover.
3. Apply protective masking tape around the factory upper, center and lower grille openings to protect the finish (not shown).

4. Align the mesh sections over the surrounds and trim the ends from the supplied #8-32 black cap plugs and install them over the mounting studs.
5. Once assembled, align the mesh grille assembly over the factory one.

6. Pull out on the top of the bumper cover and install a supplied large black plastic washer and a #8-32 ESNA half nut onto the inner lower mounting stud and tighten. **DO NOT OVERTIGHTEN** or you could indent the surrounds at the stud locations. Tighten only until the grille section is snug.

7. Tuck the surround outer corner underneath the factory grille surround and install the supplied large black plastic washer and #8-32 ESNA half nut onto the outer upper mounting stud. Tighten only until the grille section is snug. Install the large black plastic washers and #8-32 ESNA half nuts onto the outer lower stud (as shown) and the inner upper stud. Repeat procedure on the opposite side.

9. Once the **mesh grille sections** are tight, remove the protective masking tape from the factory grille surrounds.

10. Thoroughly clean the **grilles** once you are finished the installation. Use solvent and a soft clean rag to remove any glue residue from the protective liner. Use alcohol or glass cleaner to remove any solvent residue.  
**CAUTION!** Be careful while cleaning as the edges of the stainless steel can be very sharp.
